

These fees represent the maximum amount for each course listed. Actual fees may be lower depending upon the cost of the materials purchased. Students are charged only for materials they receive or use during the school year. The fees will vary according to the courses in which the student enrolls.

Graphing calculators may be necessary for Algebra II and other advanced math courses. The school can provide TI-83 Plus calculators for some Algebra II students. Students taking other advanced math courses will be asked to purchase a graphing calculator.
